2. DESCRIPTION

DSS Adhesive reinforcing mesh is a fibre tape used to reinforce your plastic. It has its own adhesive backing to make it stick to any plastic. Available in 20 meters rolls (68 Foot Roll).

3. FEATURES

- Self-Adhesive.
- Inexpensive to use.
- Adds the necessary strength to the repair area.
- Allows filler to penetrate through tape for added strength.
- Easy to cut to the required size.

4. APPLICATION INSTRUCTIONS

1. Sand repair area with 80-120 grit sand paper.
2. Clean repair area with recommended cleaner (all plastic prep).
3. Cut tape to required lengths. Cut as many pieces as required.
4. Apply tape strips over rip, gouge, or bend to form replacement tab.
5. Apply thin coat of adhesive filler to tear repair area, or, liberally apply repair material for replacement tab.
6. Apply more adhesive fillers over tape as required for additional strength.
